

About

About

AT Communication is a global corporation with operations in Europe, Asia, Africa, CIS, North America, South America and Asia-Pacific. Headquartered in Lucerne, Switzerland, AT Communication is backed by a direct sales and distribution network comprising resellers, distributors and agents. In addition, our extensive network and international service centers provide direct in-country and on-site technical support to our customers.

With over 25-years' experience and through strategic growth and acquisitions, AT Communication has expanded beyond its commercial and military communications business to include custom engineering design, technical services and a range of integrated products and systems.

Experience and Expertise

AT Communication provides leading edge solutions serving the latest commercial, defence and security requirements. The AT range of products are designed around a “building block” architecture to provide expanded capabilities and capacities with integrated, simple and easy to use components for mission critical environments.

When it comes to product and systems solutions, we are a one source, many solutions provider. Harnessing a “building block” approach to design and exploiting the engineering experience and expertise of its operating units, AT Communication is able to provide a single resource for innovation, integration and custom design to meet the needs of its commercial, defence and security customers.
