Secure, Simple to Use and Versatile

The VHF-90M Military transceiver is a state of the art communication device specifically designed for tactical military applications. It is an extremely compact and light weight unit, featuring only essential controls to ensure ease of operation. The VHF-90M can be work on the back in Manpack configuration or on the front in Squad radio configuration. The radio is available with five modes of communication.

- Analog Fixed Frequency (F3E Stanag 4204 ANPRC 77 Compatible)
- Secure Digital Fixed Frequency
- Secure Digital Frequency Hopping
- Secure Digital Free Channel Search (FCS)
- Digital Data Transmission

Designed For Tactical Use

The VHF-90M addresses two roles. When used with a short antenna it is ideal squad/platoon level communicator which is light and simple to operate.

When fitted with a full length tactical whip antenna it becomes capable of use at company/ battalion/brigade level where longer ranges are required.

In both roles, the ECCM capability ensures low probability of intercept. The dual role capability simplifies equipment logistics and renders the VHF-90M as capable replacement of the PRC-77 and equivalents.

The VHF-90M has a simple user interface which provides infantrymen sure and dependable communication in tactical conditions. Only essential controls are included on the front panel for simple operation in battlefield conditions. Advanced programming functionality is available in sub-menus. The VHF-90M can be either field or PC programmed.

The VHF-90M is solidly constructed and designed to withstand rigorous military use. Emphasis in the design of the VHF-90M has been placed on value engineering to ensure low cost of ownership over a long service life. This is achieved by utilising SMD components from generic multi-sourced families.

In short, this revolutionary new transceiver incorporates the very latest in RF and DSP design technology. The VHF-90M is the most cost effective, compact, versatile, high performance VHF transceiver available in the tactical military market today.
